It is the difference that sets you apart from your competition.

Why repipe when you can ePIPE.

REMEMBER:

There is only one

Exciting News, IAPMO Listing Change

We have received an update to our IAPMO listing, which now states that we are listed to work on **metallic** and **non-metallic** piping systems. We are currently the only company with this listing.

Anderson Plumbing Converts Half of Its Business to ePIPE

Anderson Plumbing, the largest repiper in San Diego, has converted half of their repipe business to ePIPE within just six months of becoming an affiliate.

During that time they've expanded with an additional crew and added a second set of equipment. They also recently completed work on their first commercial project, the La Mesa Convalescent Hospital.

Sierra Pipe Restoration Helps Leaky Pool Pipes

Sierra Pipe Restoration recently completed a pool ePIPE project and helped a homeowner save thousands by not having to rip up the pool deck to access the piping.

"We have seen more and more interest from customers regarding pool lines in our area," Deane Crow said, president of Sierra Pipe Restoration.

Website Performance

We put a lot of effort into driving traffic to our web site by monitoring and improving our web presence in search engines. The following two metrics help us measure our results, **People Count and Visits**.

In April our People Count, also known as unique visitors, was 3,028, up 57% from the previous month. A person is only counted once no matter how many times they visit the site in a given month. People Counts are typically used to determine how popular a site is.

The Visit count for our site was 5,802 for April. Visits are considered live until the user's interaction with the site has ceased for a 30-minute period.
