ePIPE chosen for Houston High-Rise Restoration

Gary Gould, President of TDT Plumbing, is pleased to have been chosen to restore a 12-story condominium high-rise building in Houston, TX. Built in the early to mid 1960's, this complex consists of two separate towers, Parc IV and Parc V, totaling 204 units. Both buildings have experienced pinhole leaks in their plumbing systems, which consist primarily of original galvanized steel pipe and some newer copper pipe. ePIPE was the preferred application accepted by the current condo association board members.

Joe Pattillo uses ePIPE to save Marriott's Jacuzzi system

The Kauai Marriott Resort and Beach Club had a Jacuzzi and fountain that hadn't been used in several years due to leaking

pipings systems. A conventional repair would have cost over \$3 million and required a full-scale shutdown. Pattillo Plumbing was able to fully restore the Jacuzzi and

fountain back to full operation in just a few days with minimal disruption. Joe used ePIPE to solve the problem at a fraction of the cost while guests lounged undisturbed in the surrounding pool and spa area.

Your Ad Fund at Work

For June, we distributed over 127 ePIPE project leads to our network.
