It is the difference that sets you apart from your competition.

Why repipe when you can ePIPE.

REMEMBER:

There is only one

Protected under US Patent 7160574 and other patents pending.

ACE DuraFlo® España, ePIPE® Featured at World Water Exposition

Jesus Naudin, President of ACE DuraFlo España, found himself in the spotlight at the 2008 International Water Exposition in Spain.

Naudin (on left) participated by representing ACE DuraFlo's ePIPE technology at the World Water Exposition alongside Larry Gillanders.

"It was very complimentary to have both an international theme with a local presence here with ePIPE in Spain", commented Gillanders.

Larry Gillanders, CEO and Chief Technology Officer, said " In development of our ePIPE product, we recognized the challenges building owners were facing with corrosion and replacement of piping systems and stepped forward when we had the opportunity to present our alternative to a repipe at the Expo."

Spain has taken a very positive leadership role in introducing environmentally friendly products, especially as they relate to health and water. ADF Espana recently announced the opening of branch locations in Madrid, Barcelona, and Pamplona and added to their headquarters in Zaragoza.

Maryland Plumbing Board praises ePIPE

The Maryland State Board of Plumbing applauds ePIPE and Larry Soskin on their commitment to approval standards in the pipe restoration business. Jack Lesho, Executive Director, wrote to Mr. Soskin saying, "The Board was impressed by the independent evaluation of the product and the process." ePIPE is the only product of its kind to meet this level of evaluation through the ICC-ES.
