### ACE Envirotech Joins '20 Million Dollar Club'

Bill Cooper, president of ACE Envirotech, has helped bring the company to new levels. Just last month Envirotech reached its \$20 million dollar milestone in ePIPE product applications. Envirotech performs pipe restoration on a national basis with offices in Baltimore/Washington, Los Angeles and Seattle. Congratulations to all that made this possible!

### ePIPE Featured in Emerging Technology Symposium

For the 2nd time this year ePIPE has been featured at a worldwide exposition. Justin Diemert, Operations Manager for ACE, was chosen to present at the International Emerging Technology Symposium, co-hosted by the International Association of Plumbing and Mechanical Officials (IAPMO) and the World Plumbing Council (WPC).

Industry experts from around the world introduced ways in which manufacturing, engineering and

trade groups are creating solutions in the areas of water, sanitation and health.

Justin presented to an elite group of industry professionals and government officials, including the EPA, on how ePIPE, a "green" product, extends the useful life of nonrenewable piping materials such as copper and steel. ACE is a member of the U.S. Green Building Council.

ePIPE products are Uniform Plumbing Code (UPC®) listed and evaluated by the International Code Council's Evaluation Service (ICC-ES).
